Well diggers speak out at meeting

Monday night's board room was packed with people representing the county's well-drilling industry who are dissatisfied with state laws regulating its industry as well as the county's interpretation of those regulations.

Three county ordinances were also discussed.

Cranie Brothers, Hedden and others voiced displeasure with the time it takes the county to sign off on drinking water wells - a total of nine days from start to finish which by state law must include four-five site visits.

"I have been doing this for 42 years and three months and what we have here is a wrinkle between government and local business," said Bruce Hedden. "I'm 26% down in production and it's all because of the turnaround time due to the time it takes for inspections."

Back in May, when the new state program was first discussed, Health Department Director Jim Bruckner interpreted the new regulations in a way that would have made the turnaround time for inspections and production faster.

Test scores explained at BOE meeting

At the BOE meeting on Monday, Feb. 23, School Board members heard about state testing results and out-of-state tuition procedures, specifically for Highlands School.

Superintendent Dan Brigman and staff recently returned from an accountability conference in Greensboro, NC, where the results of 3rd grade 2008-2009 pre-test scores were addressed at length.

"When I first saw the scores I lost my breath," said Brigman. "But we realized the state had changed the bar mid-stream and we are to look at these again in the spring."

Second-grade teachers saw the poor results as an indication of their proficiency as teachers but the state has said the 2nd grade teachers aren't to blame for the low test scores and they issued a statement of explanation.

They said the new 2008-09 pre-test for third graders was the first time such a test was administered and the first time students new to the 3rd grade ever took a standardized test where they had to read independently and answer questions in a bubble format, said Testing Coordinator Pat Daivs. "This coming off summer break the second week of school, basically just out of the second grade was tough for them."

The state announced that the pre-test was given at the start of the year comparing this time this year.

Town Board tidbits from Feb. 11 meeting

At the Feb. 11 Town Board meeting, Town Manager Jim Fatland presented a comprehensive treasurer's report including a summary comparing this time this year to this time last year.

"You'll see on the summary page, that year-to-date revenues are up slightly - 1.5% - from this time last year," he said. "Whereas expenditures indicate spending is 6% faster than this time last year."

Current month revenues totaled $944,958. Revenue for the town is reflected in the General Fund and comes from various taxing entities, fees, and state and federal reimbursements.

Year-to-date revenue is $3,885,563 with 64.76% revenues collected compared to the same year-to-date period last year at 63.21%.

Current month's expenditures are $3,771,899, year-to-date $3,262,233 or 54.37% compared to this time last year at 47.75%.

Once again statistics indicate that NC Local Option Sales Tax proceeds continue to surprise - for year-to-date 2008-09, $567,757.46 has been collected with only 29.03% of the $800,000 budgeted left to be collected.
Rational thinking, not ‘talking points’ is the answer to economic problems

Dear Editor

As we see the world’s developed countries try to avert economic armageddon, we need to reject the use of talking points based on political party ideology and look rationally at our situation. In particular, the following “truths” need to be dismissed for their profound lack of accuracy:

1. Tax cuts are the key component of any sound economic policy. The tax cuts of Kennedy, Reagan and Bush are being cited as resounding successes worthy of emulation. The Kennedy tax cuts were proposed as policy cutting the top marginal rates from 91% to 65%, and the capital gains tax from 25% to 19.5%. To complete this, tax policy legislation was enacted under Lyndon Johnson which permanently lowered tax rates to these approximate levels. President Johnson also initiated a “guns and butter” (Vietnam War and Great Society) economic policy which was seen as largely responsible for the inflation which threatened our economic security in the following decade.

2. The Reagan Tax cuts were wildly successful. The lowest percentage of national debt compared to Gross Domestic Product since World War II occurred under Jimmy Carter. It nearly doubled during the 12 years of the Reagan/Bush administrations. It then declined under Clinton (thanks in part to a tax increase supported by no Republicans). The Clinton administration ended with a healthy economy (mild recession, significant progress in job creation and middle class income) and a balanced budget.

3. The second Bush administration featured a record period of economic growth. While this may be true in some respects, it does not reflect the near doubling of the national debt from 5.7 trillion to 10 trillion dollars, and the lack of progress by the middle class (virtually no jobs created). One could consider the 4.3 trillion dollars of deficits incurred by the Bush administration as over 500 billion dollars a year in economic stimulus. Then the question becomes how the current concern of the Republicans was so absent as this travesty of economic man-

agagement was occurring. To put it into perspective, every dollar spent on Iraq, Afghanistan, and the Medicare Drug Entitlements was borrowed from our children and grandchildren. We are certainly the most hypocritical generation economically in the history of our country.

4. Tax cuts greatly increase revenue growth. Real (adjusted) revenue growth was 19% for the Reagan administration and 41% for the Clinton administration. Bush II’s numbers are lower than Reagan.

Now for some economic truths:

1. We have an endless march of governors (both Democrats and Republicans) wanting federal stimulus dollars while preceding their remarks with self-congratulatory remarks about their record of tax cuts. We seem to have embraced tax cuts as the medicine for which there is no cure. Once cut they are embraced as acts of moral superiority and not subject to reconsideration (except by Reagan, Bush I, and Clinton).

2. Stable policies in both taxing and spending are more effective. For the United States to regain national economic health, we need to embrace the economic policies of revenue stability and fiscal restraint. When we return to economic growth we should not listen to any politician advocating a new social program unless a prior off-setting program cut is achieved. Cutting taxes in some categories may be more fair, but in reality it demands the same scrutiny as an increase in spending. Tax cuts need to occur only after our budget is balanced and a sizable portion of the national debt retired. Deficit spending may have a more stimulative effect on the economy than unfunded tax cuts, but in a future growing economy, both need to be rejected. Rhetoric over “returning the people’s money” must be considered in terms of a deficit, not a surplus. If we have to borrow the money for tax cuts, it is a debt written for future generations to resolve, not the just the return of our rightful wealth.

3. For Democrats, there will be no peace dividend. We live in a dangerous world. If for some reason (highly unlikely) defense spending can safely be reduced, the resultant windfall needs to be devoted to deficit reduction, not program creation.

4. All of us need to treat this economic crisis as our legacy to our children. Our parents gave us a safer, more prosperous world than they inherited. I doubt seriously if history will be so kind to us.

**Obituary**

Hazel Jane McClure

Hazel Jane McClure, age 86, of the Goldmine Community in Highlands, NC, died Monday, February 23, 2009, in a Highlands hospital. She was a native of Macon County, the daughter of the late Elbridge and Delsie Gibson Dendy. She was married to the late Sherman McClure, who passed away May 4, 2003. She was a homemaker and a member of Goldmine Baptist Church. She is survived by one son, Richard S. McClure of Highlands, NC; two brothers, Alton Dendy and Frank Eugene Dendy both of Highlands, NC; two grandchildren and one great-grandchild also survives. She was preceded in death by a son, Leon McClure.

Funeral services will be held Wednesday, February 25th at 2:00pm at Goldmine Baptist Church, with Rev. William Wooten and Rev. Alton Dendy officiating. Burial will be at Mt. Moriah Cemetery.

Memorials may be made to Mt. Moriah Cemetery Fund, c/o Mary Owens, 21 Pinecone Drive, Franklin, NC 28734. Bryant-Grant Funeral Home is in charge of arrangements.

Online condolences may be made at www.bryantgrantfuneralhome.com.

**Milestone**

Frederick on Chancellor’s List

Claire Frederick, HS Class of 2006, was named to both the Dean’s List and the Chancellor’s List at UNC-Greensboro for the Fall Semester.

Students who earn a grade point average of 3.50 or better and who have no grade below B- for the semester. To make Chancellor’s List, full-time undergraduates must have a cumulative grade point average of at least 3.65 of a possible 4.0.

**Katy’s on Main HUGE SALE!**

CRAZY PRICES!

A couple weeks ago I was verbally pounded by an offended reader concerning my flawed research and investigative reporting on women’s bras. I’m sure he or she is going to nail me again after reading this. Yes, I’m concerned ‘causal’ like all my readers to be happy. Will everyone please lighten up for crying out loud? There’s a dad-gum depression on the way and we need to yuck it up a bit.

Besides, Highlanders need information about the sex life of the camel because, if you recall, there’s a camel in our Christmas Parade. Camels can become unpredictably...well, you know...sexually aroused. Also, last week, in my “predictions and rumors” column I informed readers that Emirates Airline has the sexiest coach passengers on the planet. I wasn’t kidding. I bring this up because, at this moment, the I’ll missus and I are sitting in the business class section of a Boeing triple seven on our way to Dubai.

First and business class sections are reserved for oil czars, sheiks, American CEOs, smugglers, tax dollars out of America and governors and senators fleeing all time. Oh, and then there’s the I’ll missus and me, parents of an Emirates pilot with flying privileges.

When I opened the curtain separating the privileged from coach passengers, this is what I saw. Of the 450 passengers on this flight, about half are Yasser Arafat look-a-likes, many wearing their traditional religious garb that resembles the tablecloths at Mario’s Italian restaurant in Queens.

I counted 10 ladies wearing burkhas, not to be confused with Bad Berka, a town in the Weimar Land district of Thuringia, Germany. But, of course you knew that. The rest of the passengers were either Pakistanis or Indians returning to the Middle East after visiting relatives in America.

While these folks may look scary to westerners, remember, we look scary to them. Except for the Islamic radicals, they are much like us, traveling to visit relatives and trying to live the good life. Wait, what does this have to do with the sex life of a camel, you ask? Absolutely nothing!

... DIGGERS continued from page 1

But when we went to the state meeting, I was told that I had interpreted them all wrong,” said Bruckner. “Furthermore, we were told that counties that are issuing same day permits are short-cutting the rules and not following the rules by the state.”

Monday night, well diggers claimed that other counties in the area — Jackson County, included — are issuing same day permits without jumping through the hoops the Macon County health department jumps through.

Well diggers also interpret the rules to allow them to self-certify, but Bruckner said that’s only allowed if they call the department a day in advance, schedule a time and meet the health department doesn’t show up when the person arrives at the designated time, then they can self-certify. “But they still can’t drill without a permit,” said Bruckner.

part of the problem is a lack of certified staff on his part. An employee has a rule that the state department must abide by. In the end, commissioners are still left arguing about the east rules the county must follow while trying to tighten the turnaround time it takes health department employees to inspect sites.

As usual, I found the Internet an oasis for information about camel sex. For example, yoga exercisers have the “camel position.” I can’t describe in print but I think it requires some spitting. Here’s a tip. Never ride a male camel when there are female camels “in season” around the area. You may get the ride of your life. A local baseball team in Dubai right now is “Sex and the Single Camel.” It’s about a camel that falls passionately in love with its master who rejects the animal’s advances and sells it. It’s a real tear jerker.

In Australia, the sex life of the camel has gone wild and they’re multiplying faster than Mexicans. Australia’s new policy is “if you can’t beat ‘em, eat ‘em,” so camel kabobs are now the rage. Actually, the hump, excersary language, is tastiest part and some eat it raw.

Double yuck!

I have also learned that male camels will have sex with anything stationary. Actually, I was in the army with a few guys like that. Anyway, this is important to know if you’re in Dubai and standing around being stationary. If you’re approached by a friendly camel, run. Also, in the Middle East regions, the infamous “camel toe” is an aphrodisiac when grilled and served with garlic hummus.

I noticed many of Dubai’s camels are missing a toe. Are you writing this down?

The View from Here

Our attachment to strays

Little Valentine is dead. Lizzie and Bull took him to the vet on Monday. It turned out that Lizzie was right. Valentine was a very sick cat. She had feline AIDS. The vet examined her, put her down, and billed Lizzie $206. If you find a sick or injured animal, and are on a budget, you may want to check charges with your local veterinarian before becoming a Good Samaritan.

I had always believed that vets and animal lovers had an unwritten contract. Under the terms of this agreement, the animal lover is expected to bring a damaged animal for care. In my imaginary contract, it is the responsibility of the vet to provide services and to charge only enough to cover the cost of care. He, or she, is expected to care for the animal without profit, but without financial loss. Good ole' Good Sam pays the nominal cost.

Everybody wins. If the animal lives and the family adopts him, the vet will be in a position to provide full charge services for years. The family feels good about their action without feeling gouged. The vet is reminded why he entered the profession in the first place. The animal is either adopted or dead, but removed from misery in either case.

We moved to Seneca, S.C. in 1988. A few months later I was riding my bike and saw a mournful Plott hound standing on the side of the road. I examined him and discovered a bullet wound in his shoulder. I rode home and returned in the car. At the hospital, he was already known as a wailing patient. I took him to a vet and explained the situation. “Who,” the vet asked, “is going to pay for his care?” I snapped that it was his job to care for Tita and me to worry about paying. The leg was infected and had to be amputated. The vet charged me only for the cost of supplies. Dr. Ross charged neither for the surgery nor for boarding during recovery.

Strays have enriched my life for years. I found Anna, the best dog I have ever owned, knocking over garbage cans to eat. At the time she was only a few months old. She became my companion and remained so for 16 years. She hiked with me in the Sawtooth Range in Idaho, and shared a canoe on the Canadian border. We swam together in the Atlantic and Pacific, and in Lake Superior. When I was out of gas and nearly out of money, we slept together in the back of my pick up. It was January in Nebraska. The temperature was below zero and the wind velocity 30 miles per hour. I remember the truck shaking in the brutal frigid wind, not the gentle rocking of a cradle, but the harsh jolting of an amusement park ride. That night I slept, or tried to sleep, in two sleeping bags. Anna was beside me, zippered up in my down jacket.

She knew the sound of my truck and was always standing, paw on the window ledge, when I came home from work. She was unbelievably graceful. I don’t know that I’ve ever seen a prettier sight than her chasing sand pipers on the beach at Park Point, MN. They flew no more than an foot above the sand, and like a cruise missile, followed the contour of the land. The flock rose as they approached an acre or fence, while she in hot pursuit, nearly matched their path.

She grew old and she grew forgetful. Shortly before we moved to Seneca, I was living in Houston, Texas. I was painting my front entry and left the door open. It was the Sunday after Thanksgiving. Anna wandered out and disappeared. After a few weeks, I reluctantly accepted the fact that she was gone. Then, one day in mid-January, I returned from work and found her resting in the front yard. We had some goods days after that, but it was clear that Anna was failing and had to be put down.

She was crippled with arthritis, senile, and nearly blind. She suffered frequent accidents. I suspected that the inability to control her bowels must have embarrassed her. In her youth she had been able to hold her waste even when I was unable to leave the hospital for a full 24 hours. We went to Hawaii over Christmas in 1989. When we returned, Dr. Ross told us that Anna had died and that he had buried her in his back yard. I’ve always suspected that he did for Anna what I could not, but I never asked.

There was no bill for euthanasia, no charge for the burial, only a modest bill for the days he had boarded her. But that was a different time.

The rage is building

I have the sense that many people are yearning for the economy to go back to the way things were a year or two ago, when things were “going great.” The main question seems to be how do we get back to the quickest way possible? I think that would be a big mistake. The last thing in the world we want to do is go back. That so-called prosperity was a huge delusional fantasy world, an empty bubble just waiting to pop.

Imagine filling your sink with hot water and lots of soap to wash some dishes. The soap creates lots of bubbles and froth on top of the water. Now imagine the phone rings and you don’t come back to the sink for 15 minutes (no, the water isn’t all over the floor, you turned the faucet off before you left). When you look at the sink it appears as if the water level has “fallen.” That’s not true at all. Of course; all that’s disappeared is the air that was trapped between the old ideas and the new ideas.

What was the “prosperity” of the last few years built on? The belief that the stock market would go up forever, that housing prices would go up forever, and that we could spend as much as we liked because the value of our assets was rising so fast we could live off the froth. To put it in plain English: insane thinking.

I see this moment as an opportunity; not to try to get back to some dream world, but to boldly try some new economic ideas. The old ideas have gotten us into this mess, so what are we doing continuing to listen to the same people who got us here?

Joseph Stiglitz, who won the Nobel Prize in economics in 2001, compared our current stock market crash to the collapse of the Berlin Wall in 1989 in an interview given last September and published in The Huffington Post.

Stiglitz said: “In this crisis, we see the most market-oriented institutions in the most market-oriented economy failing and running to the government for help. Everyone in the world will say now that this is the end of market fundamentalism. In this sense, the fall of Wall Street is for market fundamentalism what the fall of the Berlin Wall was for communism — it tells the world that this way of economic organization turns out not to be sustainable. In the end, everyone says, that model doesn’t work. This moment is a marker that the claims of financial market fundamentalism were bogus.

“The globalization agenda has been closely linked with the market fundamentalists — the ideology of free markets and free market liberalization. The hypocrisy between the way the U.S. Treasury, the IMF and the World Bank handled the Asian crisis of 1997 and the way this is being handled has heightened this intellectual reaction. The Asians now say, ‘Wait a minute you told us to imitate you in the U.S., you are the model.’

Nouriel Roubini, an economist who has become famous in the last year for being one of the first and most accurate predictors of our current financial meltdown, titled his latest weekly column on Forbes.com “The Anglo-Saxon Model Has Failed.”

Roubini writes, “This severe economic and financial crisis is not only leading to a severe backlash against financial globalization, free trade and the free-market economic model. To paraphrase Churchill, capitalist market economies open to trade and financial flows may be the worst economic regime — apart from the alternatives. However, while this crisis does not imply the end of market-economy capitalism, it has shown the failure of a particular model of capitalism. Namely, the laissez-faire, unregulated (or aggressively deregulated), Wild West model of free market capitalism with lack of prudential regulation, supervision of financial markets and proper provision of public goods by governments.

Now we hear people talking about nationalizing the banks, and I have read editorials — in favor of this happening — start off by apologizing about the word “nationalization.” The New York Times editorial board said “Americans have a visceral horror of the word nationalization” so they suggested we call it something else to make it palatable. Frank Rich, in his latest New York Times op-ed piece said, “Until he started hedging a little last weekend, the president has pointedly said that nationalizing banks, while fine for Sweden, wouldn’t do in America, with its ‘different’ (i.e., non-socialist) culture and traditions. But the word nationalization, once mostly whispered by liberal economists, is now even being tossed around by Lindsey Graham and Alan Greenspan. It’s a dear indication that no one has a better idea.”

Paul Krugman, in last Monday’s column in the New York Times, said many people think nationalization is “un-American.” He assured his readers that in fact it was “as American as apple pie.” He continued, “But what we haven’t in private enterprise, it’s lemon socialism: banks get the upside but taxpayers bear the risks. What we want is a system in which banks own the downs as well the ups. And the road to that system runs through nationalization.”

In this country we have been indoctrinated into the belief that socialism is some terrifying foreign system that would destroy the fabric of American life. The joke (not very funny) is that we already have socialism in this country.

Just for starters, as Mr. Krugman pointed out; we have socialism for large financial institutions. These banks and investment houses can rake in huge profits when things are going well, but when they get in trouble they are “too big to fail” and the dupe, I mean the taxpayer, comes in to bail them out. This system is called “privatized profit and socialized risk.” These financiers are only capitalists when they’re making profits. A true capitalist would welcome recessions because they clear out the weak and sickly companies.

Two of the most popular government programs, Social Security and Medicare, are socialist programs. And the public support for these socialist programs is so strong that it has been called the “Third Rail” in politics — so dangerously charged it instantly kills anyone who touches it.

I have long thought that conservatives should be in debt to FDR for his New Deal programs because they foresaw and led a possible revolution in this country. There’s a lot of rage building up across the nation and across the political spectrum and the politicians would be wise (I think) to take note.

Speaking of FDR and the New Deal, I’ve got a thought for all those conservatives upset about Obama’s stimulus package. Let’s grant the current conservative talking point that the New Deal didn’t end the Depression, World War II did. Here’s the thought: What was WWII but one huge stimulus package? Full employment was created through the draft — even women worked (at time when very few women worked outside the home) — and there was lots of government spending on munitions, uniforms, food for troops, etc. The conclusion? FDR just didn’t think big enough in the New Deal.

All of Katie Brugger’s columns are available on her website: www.kathleenbrugger.com
Offending the Islamofascists

by John Armor

It was just a minor story on recent about a Dutch politician being denied entry to Britain at a London airport. You might well have missed it. But it was an extremely important event for its broader meaning.

Geert Wilders, a member of the Netherlands parliament, was invited to Britain by a member of the House of Lords. The invitation asked Wilders to show his 17-minute film "Fitna," which he made last year. Fitna juxtaposes quotes from the Koran with images of Islamofascists attacking and murdering various non-Muslims.

Last year there were riots around the world by Muslims against this "anti-Islamic" film. None of the protesters claimed that the quotes from the Koran were inaccurate or that the murders and assaults depicted were in any way inaccurate.

The day before Wilders was to fly to London, British Home Secretary Jacqui Smith told Wilders not to come because "his opinions would threaten security." Wilders made the trip anyway, and was arrested at the airport in London and put on another flight back to Amsterdam. While he was on the ground in London, he condemned Britain for stopping him. He called the British government "the biggest bunch of cowards in Europe."

Why should we care about what seems to be a minor dust-up at a London airport? It is because all Western governments are in various forms of retreat from the truth about the Islamofascists, because the murderers themselves and their millions of Muslim enablers will burn cars and buildings, attack police and civilians in return for anyone speaking the truth about them.

Two recent examples of such retreats from the truth to appease the friends of the murderers happened in the UN, and in the US. The UN has just taken under consideration a speech code which would define "anti-Islamic" any criticism of Muslims or Muslim governments. The Nazis and the Communists certainly would have preferred such a resolution respectively in the League of Nations, or the UN. But neither the Nazis nor the Communists had the high number of corrupt governments to vote in their favor, as the Muslims do today.

The other example of retreat from the truth happened in the US last week when President Obama spoke to the national prayer breakfast. He claimed this is in that lightly covered speech: "But no matter what we choose to believe, let us remember that there is no religion whose central tenet is hate. There is no God who condones taking the life of an innocent human being. This much we know."

Well, anyone who knows that "fact" is a brass-plated, geopolitical moron. If you go back far enough in history, all of the world's major religions have at some time supported the murder of thousands of men, women and children who were of different backgrounds. And all of those religions have, at those times, claimed that their respective gods were in favor of those slaughters.

Most of the world's major religions have become more civilized as the centuries have passed. All except Islam, which is stuck in 7th century, and still justifies the murder of non-believers.

None of us should pretend that the truth is not true, and pretend that the political and religious leaders of Islam are "just like us" (sort of). We are facing millions of mass murderers, and hundreds of millions of supporters and enablers of those murderers. Pretending that they are not there, and do not intend what they repeatedly say and write in public, will solv nothing. It will cause more of us to be murdered.

It is wrong to call the Islamofascists animals, because they are much worse than that. Animals kill to eat, and occasionally kill rivals during mating season. They do not kill at random and in large numbers.

It is right to call the Islamofascists "beardless cowards." (Look up a history of animals, because they are much worse than that. Animals kill to eat, and occasionally kill rivals during mating season. They do not kill at random and in large numbers.

I believe that those of us who are privileged to have the opportunity to have their thoughts read by others have a responsibility to occasionally try to deflect reality and put things on a relatively lighter note. It is Friday morning. I have searched the news and examined my mind to find some element of good news since I submitted my last column and I am coming up empty.

Many who are reading this column weren't around when Jimmy Carter took a crack at ruining our country.

Unfortunately, I remember well the feeling I had every morning when I woke up to the reality of the state of America.

There was a thing called the Misery Index that measured the sense of futility felt by the man on the street. As Carter's administration ground on, the index went higher and higher. I never wanted to feel that way again. The best thing that could be said about Carter's fiasco was that it took a little while for him to do his damage. I don't think people realized how bad things were and were going to be until well into his administration. The economy went in the crapper, our status in the world was at a low point and the Misery Index prospered.

The difference between Carter and Obama is Obama started digging a hole the moment he acquired power and is feverishly digging deeper and deeper. Every day he jets to a new opportunity to talk down the economy and remind us that a catastrophe is imminent. Every news cast tells us that Iran has enough uranium to produce a bomb. North Korea tests a long-range missile. Not his fault but his responsibility. He wanted it, he's got it.

How did we get in this shape? How is it possible that the voters at one time or another have elected Obama, Biden, Pelosi and Reid who ended up running our country? Not trying to be disrespectful or anything, but I swear in a week I could interview the readers of this paper and find people more qualified to lead us than the boobs in power.

I remember like it was yesterday taking a bunch of people I worked with out to lunch. One of the folks was a young lady, a capable employee, and a good person, who had recently attained voting age. It was campaign time and the subject of conversation turned to the coming election. She allowed that she was going to vote for Carter “because he deserves a chance.” WHAT? We saw how that mentality worked out.

Personally, as I have explained in the past, when occurrences defy logic or any reasonable explanation, I attribute them to the supernatural. In my mind, what isn’t natural is supernatural in one way or another. How is it possible that in a country where students pay $40,000 a year to obtain the best education available, we produce and elect leaders that have put us in the mess we’re in? Well, for openers, common sense 101 isn’t in the curriculum of Ivy League and other top-tier schools. Nor, evidently, are honesty, ethics and morality. Where did these qualities go? My guess is that when the kids left home for college, they still had some inklings of good vs. bad, right vs. wrong, up vs. down. The teachings of Saul Alinski, Al Gore and other deranged souls have ruined young minds of rational thought.

Over two or three generations, God’s influence on society has gradually been replaced by man’s influence. How’s that working out, folks? So, throw God out of school, and unGod will and has filled the void. It’s physics, my friend. That worked so well, we are in the process of throwing God out of the public square. The result? Obama, Biden, Pelosi and Reid, not to mention Barney Frank, Chris Dodd, Eric Holder, Tim Geithner, etc.

I’m not saying these people are the collective anti-Christ. I am saying that we are being governed by people who forgot, or never knew, the concept of public service, the void of which is filled with self-service. Again we raise the question; how did these people attain public office? Those charged with the responsibility of voting for their leaders evidently had more pressing issues at the time preventing them from giving serious thought to the results of their choices.

Undereducated, misdirected, caught up in the emotion of the moment? I don’t know. I do know that God still rules and sometimes He punishes us, takes away our toys and puts us on our knees. Not yet? We’ll see... TESTING from page 1 school for 3rd graders to set a benchmark from which to judge later in the spring when the same students will be tested again to judge progress.

In addition, reading and math are considered the two hardest subjects and typically a student will do well in one or the other but not both. “It’s a very well-rounded student who can do that,” said Davis.

Finally, Davis said it’s important to note that second-graders aren’t prepared for testing. Teachers are basically trying to get them ready for the third-grade, not teaching them to take tests. “So this is very new to them.”

For reading there were four levels of proficiency.

Of the 334 3rd graders in Macon County, 53.29% read at Level 1, 26.05% read at Level 2, 15.97% read at Level 3 and 4.79% read at Level 4.

Of the 32 3rd graders at Highlands School, 59.38% read at Level 1, 21.88% read at Level 2, 15.63% read at Level 3 and none read at Level 4.

For math there were also four levels of proficiency.

Of the 334 3rd graders in Macon County, 53.29% read at Level 1, 26.05% read at Level 2, 15.97% read at Level 3 and 4.79% read at Level 4.

Of the 32 3rd graders at Highlands School, 59.38% read at Level 1, 21.88% read at Level 2, 15.63% read at Level 3 and none read at Level 4.

... TESTING page 9
... TESTING from page 8
administered to 10th-grade students the Fall of 2008 in algebra 1 & 2, biology, chemistry, civics & economics, English 1, geometry, physical science, physics, and U.S. history.

In Spring 2009, the same tests will be given to the group of students who took the same courses this semester. Then these scores will be combined to indicate the overall scores in each school in the Macon County system.

Except for U.S. History, Highlands students scored significantly higher than Macon County as a whole. Some courses aren’t offered to 10th grade students in Highlands.

Algebra, 94.4%, Algebra 2, 80%, biology, 92.3%, chemistry, 100%, civics & economics, 91.7%, physical science, 100% and U.S. history, 58.3%. English 1, geometry and physics weren’t tested at Highlands School.

Administrators and teachers continue to be frustrated with the state’s targets and testing requirements because the state raises the bar while changing the tests.

“Basically, the state raises the bar and changes the tests because when students do too well, the test figures the tests are probably too easy so the bar is raised,” said Davis.

The targets for reading in 2007-08 were originally planned to be 84.4% for grades 3-8 and 56.9% for grade 10. However, these percentages changed due to the new test additions administered in 2007-08.

“When cut scores were changed, North Carolina changed the target goal to reflect NC’s performance on the NAEP test,” said Brigman. “This action caused the targets to lower at the same time the test was made more difficult.”

NC’s state reading target changed from 84.4% to 43.2% in 2007-08 for grades 3-8 and 56.9% to 38.5% in grade 10. In 2010-11, the target will go up again to 71.6% in reading for grades 3-8 and 69.3% for grade 10.

In addition, the NC State Board of Education raised standards for Algebra 1 and English 1 in 2007, raised mathematics standards for grades 3-8 in 2006, and raised reading standards for grades 3-8 in 2008.

Target goals were also raised for grades 3-8 in mathematics for 2008 (from 65.8 in 2007 to 77.2) meaning a greater percentage of students must pass the state tests for the school to make Annual Yearly Progress.

According to the NC Public Schools website, higher target goals are set according to regulations supporting the federal expectation that all students achieve grade level or higher standards by 2014.

Davis also announced that the 4-year cohort for graduation in North Carolina is now 70.3% and 77% for Macon County.

Out-of-State Tuition
After suggestions from board member Frieda Bennett, the board is further amending its out-of-state tuition policy possibly to waive tuition to reflect hardships for families in the Highlands School district due to “geographic isolation.”

She said the distance and terrain parents have to travel to get to school need to be considered as it is in other mountain school districts in Watauga County.

“We need to take into consideration the time it takes for families to get to school and the fact that Highlands is drier,” she said.

The amendment will be discussed again at the March 23 school board meeting at Highlands School.

Highlands School construction
Superintendent Brignan requested the board to OK $90,000 to be allocated for construction projects at Highlands School.

The funds will be used for design & development, and construction bidding & administration for three restrooms - one in the lobby, elementary wing and an auxiliary facility for the new soccer field; a new entrance canopy and drive in the front of the school, and new kitchen lighting and sidewalk lighting.

- Kim Lewicki
Agencies seek climbers support as raptor marks 10 years off endangered species list

Ten years ago the peregrine falcon, the world’s fastest bird, was removed from the threatened and endangered species list and wildlife biologists look to rock climbers as a key part of the bird’s continued success in Western North Carolina.

Although it ranges across much of North America, the peregrine falcon is not common and in North Carolina it nests in the western part of the state, atop the high, broad cliffs often used by rock climbers.

“The peregrine falcon is an endangered species success story,” remarked Chris Kelly, a biologist with the North Carolina Wildlife Resources Commission. “Key to that success has been the willingness of rock climbers to make concessions for the birds and we hope area rock climbers will continue to be a part of the success. ”

Seven of the 13 known nesting sites in Western North Carolina are on National Forests, and each year during the breeding season, the USDA Forest Service restricts access to these areas, which are often popular with rock climbers. Biologists implore climbers to heed restrictions access to these areas, which are often popular with rock climbers. Biologists implore climbers to heed the closures signs. Adult birds may abandon a nest if molested while older nestlings are especially sensitive to disturbance and may bolt off a ledge before they can fly if approached by a climber. This makes late spring, when visitation at the cliffs tends to increase, an especially critical time for nestlings.

“We understand the sacrifice made by the rock climbers for the birds,” explained Sandy Burnet with the USDA Forest Service. “We appreciate that sacrifice and hope they know they are contributing to the peregrine’s success — that their contribution helps keep this bird from returning to the endangered species list.”

The 2009 closures will run from Jan. 15 to Aug. 15. If falcons aren’t using a site or nesting finishes earlier than August 15, the site may be opened to the public. Likewise, if the falcons chose a nest site outside the existing closure area, the new area may be closed. Areas currently closed include:

- The peregrine is a crow-sized raptor that nests on tall cliffs, or even urban skyscrapers. It feeds on other birds and has been known to reach speeds up to 200 miles per hour diving after prey. Its numbers declined sharply after World War II due to the widespread use of DDT and other organochlorine pesticides. In 1970 the U.S. Fish & Wildlife Service placed the falcon on the endangered species list under the Endangered Species Conservation Act of 1969, the precursor to the current Endangered Species Act.
- In 1975 North American peregrine numbers reached an all time low of 324 nesting pairs. The banning of DDT in the United States in 1973 laid the foundation for peregrine recovery which included the captive breeding and subsequent release of more than 6000 birds in the U.S. and Canada between 1974 and 1999, including 92 in western North Carolina. When it was removed from the list of threatened and endangered species in 1999, there were at least 1650 breeding pairs.
- While steady, peregrine numbers in the state are not large, with only 10-13 pairs seen each year. Peregrines mate for life and tend to return to the same area each year to mate and nest. They nest once a year, and due to strong territoriality, each cliff site will support only one pair of birds. If the birds abandon the nest or otherwise fail to nest, a year of reproduction is lost.

Salmonella outbreak is killing local birds

By Cynthia Strain

Several Highlands residents who feed wild birds have called me with reports of dead birds in their yards, and in one case a dead rabbit. These appear to be related to a salmonella outbreak among bird populations in the Southeast.

The outbreak seems affect primarily Pine Siskins. They and other finches are particularly susceptible because they flock and feed in large numbers, which makes transmission of diseases easier.

Salmonella is mostly spread through fecal contamination of the birds’ water and food. Cats or dogs that eat dead birds or other birds can be sickened by the salmonella and possibly spread it to the humans that care for them.

Cleanliness is very important not only in dealing with this outbreak but in preventing future deaths, and it should therefore be a regular part of your bird feeding routine.

Clean your feeders and birdbaths with soapy water and 10% bleach solution. Soak them for 30 minutes, rinse them very well. Be sure to wear rubber gloves.

Rake and clean up the ground below your feeders (the mess of rotting seeds and hulls harbor many disease-causing germs).

If you have found dead or dying birds in your yard, do not feed birds for 2 weeks or until no more dead birds are being reported in your area. Forcing the birds to disperse and feed in the wild will help stop the spread of Salmonella.

Then move your feeders to a new uncontaminated location. The outbreak should die down with the onset of spring and the return of the pine siskins to their northern habitats.

For more information please check out the Cornell Lab of Ornithology’s website at http://redesign.birds.cornell.edu/
Grant money for infrastructure on its way

The ABC board has authorized architectural expertise to plan for new police facilities in the area, including an ABC Store building that will become a new police station. The town is in the process of redeveloping this location. The police force will have better facilities and offices than they currently have. This move will provide the ABC board with more space and better facilities.

Before the town can develop the Kelsey Hutchinson Park on Pine Street, we must address the stormwater problem in that area. We have applied for a grant from the Clean Water Management Trust Fund to help with this project. The Town of Highlands has been granted an award of $180,000 in addition to services from Crystal Stream Technologies and McGill Engineering Associates, saving the community another $40,000.

Engineers have devised an innovative method of handling this water runoff problem, which will be implemented in this area. Installing these stormwater improvement projects at Kelsey Hutchinson Park will provide the Town of Highlands with the opportunity to promote public awareness of stormwater runoff quality and the benefits of low-impact design concepts. If successful, Kelsey Hutchinson Park can be used as a model to help guide other mountain communities toward sustainable development through the use of innovative stormwater technologies.

The town is extremely grateful to McGill Associates, their President Joel McGill and engineer J.P. Johns for making all this happen. Thursday of last week several of us went to a workshop in Asheville organized by McGill Associates and the Southwestern Commission to obtain the latest information on the federal government's economic stimulus package. Congressman Heath Shuler spoke and state and federal officials who will administer grants and loans through this new legislation just signed last week by President Obama was discussed. The Town of Highlands has applied for four separate grants and we were encouraged that we have a good chance of obtaining funds for our water and sewer systems along with several other smaller projects in which federal money is now available.

It is good to see that the ABC board has finalized negotiations with the Highlands Plaza and will soon be moving out of their Oak Street facility. They will have a larger area with a much better location adjacent to Bryson's Food Store at the Highlands Plaza. This will free up the current ABC facility to become a new police station once renovations of this building are accomplished. We will be obtaining architectural expertise to plan for new police facilities in that building which was built originally as an ABC Store in 1977. Our police force deserves better offices and facilities than they have currently and we are looking to get them moved sometime this year.

At the beginning of April the Presbyterian Church will have a new minister and I will be relieved of my duties of preaching weekly although I will remain Parish Associate. Rev. Dr. Lee Bowman is a highly qualified minister whose present church is the First Presbyterian Church in Lexington, KY, a church of 800 members. She is also on the board of directors of the Columbia Theological Seminary near Atlanta and is chairman of their search committee for a new president. The current president of the seminary highly recommended Lee to the church. The Pastor Nominating Committee reviewed over 150 applications in making this recommendation to the congregation of the First Presbyterian Church. Their recommendation of Lee Bowman was overwhelmingly approved. The church is pleased to have such an outstanding person coming as the pastor and we all look forward to welcoming Lee Bowman to our town.
USFS backing heritage project linking Highlands and Walhalla

Within the next two years, the Oconee Heritage Center (OHC) hopes to have a new venue where Oconee residents and visitors can learn about Appalachian heritage and culture. The OHC has submitted a proposal to the USDA Forest Service to use the historic Russell Farm site on Highway 28 as a living-history farmstead.

"The vision is to have a working farm in the mountains where patrons will learn about life in this region during the late 18th and early 20th centuries," said Nick Gambrell, director and curator of the OHC. "Since opening in 2004, the Oconee Heritage Center has been working towards this goal by collecting historic structures, farm equipment and searching for a site to house this idea."

Submitting a proposal to the Forest Service was an idea that grew out of a conversation between Gambrell and Andrew Pickens District Ranger Mike Crane.

"In the fall, Nick and I went up to the Russell site to gather some materials for our new Forest Service exhibit at the OHC when he started talking about his goals for a southern Appalachian farmstead," said Crane. "Thermore he talked, the more it made sense for the Forest Service to consider other ways for us to work together."

The Russell Farm, which lies on National Forest lands alongside the Wild and Scenic Chattooga River, still contains nine buildings that were once part of a large farm originally comprised of several hundred acres. The main house was destroyed by fire in 1988 along with two other outbuildings.

"If approved, the Russell site will serve as an excellent location for this project because of its authenticity," said Gambrell.

The Forest Service is now reviewing a draft proposal submitted by the OHC which includes the conservation of the remaining buildings of the Russell Farm, installation of OHC-collected buildings currently in storage, conservation of the old road between Walhalla and Highlands and interpreting all eras of occupants as well as the role of the Appalachian heritage and culture. The OHC has submitted a proposal to the USDA Forest Service to use the historic Russell Farm site on Highway 28 as a living-history farmstead.

"The overarching project approach is respect for and interpretation of the historic landscape of the Russell Farm by rehabilitating the original fields, the historic stagecoach road between Highlands and Walhalla, conserving the remaining structures of the farm, and sensitively incorporating additional historic structures onto the site."

The Russell Farm served for many years as the "Midway House" between Walhalla, S.C. and Highlands, N.C. Because the railroad ended in Walhalla, travelers to areas such as Highlands had to continue their journey into the mountains by stagecoach. A journey to Highlands from Walhalla was a long, two-day ride. Thus, the Russell House served as a boarding house along this road for that overnight stay. It is reported that as many as 80 visitors stayed at the house at one time while waiting to cross a swollen Chattooga River. Despite the loss of the main house, the Russell Farm is still listed in the National Register of Historic Places in America.

Buildings collected by the OHC include a dogtrot cabin from Elizabethtown, KY, a blacksmith shop from Westminster, a one-room cabin from Georgia, a mill works from the Burns Mill in West Union, a Smokehouse from Pickett Post and many more.

Currently, the OHC is preparing a site plan with the assistance of the Oconee County Planning Department and Clemson University’s Planning and Landscape Architecture Department. Assistant Professor Carl Goethues, a historical landscape architect, is working with landscape architecture student Jonathan Fritz to accommodate the vision of the OHC at the Russell site.

If the proposal and site plan are accepted by the Forest Service, an environmental analysis, including public input, could be conducted as early as spring 2009.

---

Macon County’s ‘Heritage Farm’ set for Siler Road

Recently, the Macon County Commissioners gave permission for the Folk Heritage Association to use bottom land along the river behind county Siler Road property to house its “Living Heritage Village and Farm.” Since Heritage Farms are considered a major tourist attraction nationwide, commissioners believe it was a good move.

At the Feb. 9, 2009 commission meeting, the board agreed to fund a portion of a $25,000 feasibility study -- a prerequisite before the organization can go after subsequent grant funding.

Commissioners agreed to the $5,000 requested, contingent upon the Franklin TDC agreeing with the project and its potential as a viable and sustainable tourist attraction for the Franklin area of Macon County.

For the past six years, the Folk Heritage Assoc., has been working on the project that would protect, preserve and share the folk heritage of Macon County and the Southern Appalachian Mountains. As a southern gateway to Western North Carolina, Franklin, has the potential to attract and keep visitors rather than just serving as a pit stop or “road to elsewhere” say proponents.

Commissioners are excited about the Heritage Farm which when combined with other attractions in the vicinity of Siler Road including the new performing arts center at the Fun Factory will offer visitors a reason to book hotel rooms and stay a while.

The Folk Heritage Assn. is seeking funding through the Blue Ridge National Heritage Area (BRNHA) established by Congress in November 2003. It is committed to protecting and promoting the historic, cultural and natural assets of the region and encourages partnerships with local, state and federal governments and nonprofit and private sectors to shape the long-term future of communities.

To get totally behind the project, BRNHA has identified five areas vital to the Macon County heritage story — music, crafts, natural heritage, historic sites and Cherokee heritage.

To guarantee funding, a good location is necessary — which the Folk Heritage Assn. feels it has found off Siler Road — but it also has to make the Franklin Heritage Village “different” from other existing heritage attractions.

The association believes it can hit every mark to secure funding and attract and keep visitors.

The site will be totally interactive, will utilize the latest “green” technology while illustrating that many “new” ways to be green are often returning to the “old” ways; a large welcome center/display area suitable for gatherings and family functions; the use of technology to involve visitors while creating the interest in exploring the re-construction of the village and farm; and perhaps foremost, capitalizing on the availability of outstanding quilts from the area which will draw a large audience.

In fact, 1980 Governor Jim Hunt signed a proclamation declaring Franklin the “Quilting Capitol of the World” and currently the group has access to four one-of-a-kind quilts.

The original “World’s Largest Quilt” — 18 feet by 21 feet; The Cabanus Quilt which is the world’s largest quilted wall tapestry at 10 feet by 33 feet; the “Celebrate America Quilt” which was designed after 9/11 and contains the autographs of many famous people; and the World’s Fair Quilt, designed and made for the president of the 1982 World’s Fair, S.H. “Bo” Boberts, which was presented to him by Governor Jim Hunt on the North Carolina Day at the fair.

The Wall Street Journal reported on April 12, 2008, that...
The last game

Monday night was an important life in the night of three Highlands High School seniors, as they wore a Highlander uniform for the last time. While the defeat at the hands of Cherokee was a bitter ending for all 15 members of the Highlander basketball team, for these three seniors, it is an especially difficult moment.

While many people may appreciate the face value of high school athletics — the camaraderie, the bus rides, the fun and the losses — very few people can attest to the tremendous amount of work put in by these students, and the investment that they make when they sign on to be a part of the Highlander basketball program.

In addition to their regular studies, these players do an extraordinary amount of work both individually and as a team to be successful, and it’s hard to understand how bittersweet those final moments can be unless you have experienced it personally.

The average four-year HHS basketball player will participate in over 300 practices in their high school career. They will play in four summer leagues, and attend more than 60 summer practices — all in addition to the more than 100 games that they will dress for in their career.

Almost every Highlander athlete, regardless of sport, will experience despair, frustration and anger during their career. These “bad” emotions come in addition to the joy, determination and success that most high school players experience both personally and with their teammates during their high school career.

The moments after the last game are not those of reflection or nostalgia, they are moments of visceral pain and frustration, over more than simply the loss of a game, but the loss of the experience.

It’s the finality of it all that hurts the most in those ending moments. The mind races through the last thoughts of what might have been, the last team prayer, cleaning out your locker for the final time, and there is true sorrow… but soon that sorrow gives way to fonder memories of bright moments — games, funny stories, and the friends that you went to battle with more than 100 times throughout the years.

It has been more than 10 years since my last game, and while the details of the games have gotten fuzzier over the years, the memories have become dearer. Whether it is the locker room stories, the long bus rides, the friendships formed or the indelible memories of certain moments, they still remain in my mind as if they happened yesterday.

Folks, this is one of the most important gifts that high school athletics can bring to our students — an opportunity to make memories that can last a lifetime.

It is my hope that soon these three seniors will look down the line at the things that they have accomplished and enjoy those happy memories that occurred during their careers wearing the Blue and Gold.

Here’s to you — Ezra, Andrew, and Michael — you will be missed on the court next year, but we will always be proud to call you Highlanders.

Impressive finale all the way around

By Ryan Potts

The end of the season was upon us last Thursday as both Highlander basketball teams vied for a Little Smoky Mountain Tournament Championship at Nantahala High School.

The Lady Highlanders faced top-10 ranked Hiwassee Dam in the championship, having been blown out twice by the Lady Eagles earlier in the season.

The Lady Highlanders used multiple defenses to keep the Eagles off balance, and the lead changed hands throughout the game. The outcome looked bleak for the Lady Highlanders late in the fourth quarter, as three crucial fourth quarter three pointers by Amber Boring had given the Lady Eagles a 4-point lead with only 3 seconds to play. However, the Lady Highlanders had one more bullet in their holster to speak, as Emily Munger drained a long 3 and the Lady Highlanders stopped the clock with their final timeout and only 1.2 seconds on the clock.

After a quick foul on Boring, the Lady Eagles senior hit two clutch 3-pointers to give Hiwassee Dam a 1-point lead — with 1.2 seconds on the clock.

The Highlanders responded early, riding hot shooting from Michael Sheard to a 12-point 2nd quarter lead. A long run by the Hawks gave them a 1-point lead at the half, and it looked as if there would be another barn burner after the girls’ thriller.

Unfortunately, for the Lady Highlanders, they ran out of miracles in the extra session, with Hiwassee Dam outscoring them 11-4 and coming away with a 57-50 victory.

The Boys Championship saw the Highlanders facing similar circumstances as the girls facing a top-10 opponent for the third time this season.

A communist recently wrote, “You’re not in Nebraska anymore, Barack,” and he’s right our President is not. The November election for President brought excitement and in some cases jubilation to America. The expectation was that there was a change in the wind, a new way of doing business in Washington and reaffirmation that the only impediments to success are talent and will, not color or sex, and that an era of “good old boy” politics would soon be over.

No we’re not in Nebraska anymore and some change dies hard. President Obama tried to open up to the Republican Party on the Stimulus Bill by physically going to them. The President went to their house and asked for their support and in return what did he get on that initial vote? He got a straight party vote, all Democrats voting yes and all Republicans voting no. It’s hard to believe that not one Republican felt the need to support the President; not one Republican had the courage to break from the party and support the President. I find it equally interesting that not one Democrat voted against it either. I guess its politics as usual in Washington — party politics.

No we’re not in Nebraska anymore and just when you thought there was hope that politicians would change people like Richard Shelby speaks out. During a period of significant financial turmoil in this country, the Senator from Alabama chose the following as his most important issue when he recently said about President Obama, “...his father was Kenyan and they said he (Obama) was born in Hawaii... You have to be born in America to be President.” Perhaps Senator Shelby went to the same schools as Governor Palin. Africa is a continent and Hawaii is a state.

Judd Gregg, Republican Senator of New Hampshire, withdrew his name from nomination for the post of Commerce Secretary because “I began to wonder if I could be an effective team player.” He accepts the nomination then suddenly has a revelation that he’s not a team player—and he expects people to believe that. It may have been a mystery to him but it took me about a nanosecond to come to my conclusion — he is a team player, and his team is not the American team but his party team and that is more than a disappointment. No we’re not in Nebraska anymore.

On the positive side of change, when asked if his own party had national leaders Republican Governor Charlie Crist said, “I think there is a national leader, his name is President Obama. The people elected him. And I’m willing to say that I’m not going to stand in his way and try to help make this work. We’re in a tough time, as we talked about before. I think we need to be bipartisan. We need to be, in fact, nonpartisan. We’re all Americans. Our country is at a dire point and we need to do everything we can to work together to get America through this.”

A recent book has been described as “politic speak” but it is encouraging none the less.

Back on the other side of positive there is Rush Limbaugh, who said about the stimulus package, “I hope Obama fails.” There are many people out there in the political world and in our little Highlands community that would rather see a nation fail or a town fail than to admit they were wrong. For them it’s not about doing the right thing, its getting credit for doing my thing. They remind me of the basketball star that would rather score 30 points and lose the game then score five points and have their team win. Limbaugh is on the team of ultra conservative panic mongers who pontificate that there is only one way to live in America the Limbaugh way. And don’t even get me started on Ann Coulter.

A communist recently wrote, “You’re not in Nebraska anymore, Barack,” and he’s right our President is not. But, I think the writer meant to parody the Wizard of Oz and say, “You’re not in Kansas anymore, Barack.” In the 1939 film Wizard of Oz, the movie starts off in stark black and white, with Dorothy and her dog trying to escape from evil Elmira Gulch. During her escape attempt, Dorothy gets caught in a tornado, hits her head and is then transported Over the Rainbow where she lands in a magical land of Munchkins where the world is full of color, happiness and song — and not to forget the Evil Witch of the East, whom Dorothy killed when her house landed on her, for which the Munchkins were then really happy. Dorothy then journeys to the wonderful land of Oz to see its wizard so he can tell her how to find her way home. It is a magical tale of friendship and courage that both warms the heart and entertains us. The Lion found courage, the Scarecrow found a brain and the Tinman found a heart, but that was just a movie and this is life.

Some people say that, “We’re not in Kansas anymore,” has come to mean that things are not the way they were, you’re out of your element, and you’re about to be smacked in the face with reality and fail. They believe as Dorothy said, “There’s no place like home,” so click your heels three times and go there. But I have another point of view on that; no we’re not in Kansas anymore and thank God for that. I believe that government, like our homes, needs a little fixing up from time to time, and this is that time. This will be a difficult journey from where we are now to where we want to be, and people can’t click their heels three times and just go home, our politicians, our leaders, all of us must work together to do it. Our country needs leadership and people working together to find the right path to fix our economy and so does our little town. I hope we all find the heart, the brain and the courage to take us there.

In two weeks I’ll have Another Point Of View.
Ex-mayor Buck Trott and Town Engineer Lamar Nix spoke fondly of Richard and his years of service.

Co-workers past and present gathered to wish Betz the best at Friday night’s ceremony.

Martha and Richard Betz, now both retired, will celebrate their 30th wedding anniversary this year.

... RETIRES continued from page 1

edging the years Betz has put in for the town, and the outstanding job he’s done. Previous Mayor Buck Trott also commend-
ed Betz noting no job was beneath him – not even seeing to the repair and cleanup of sewage that twice backed up into Town Hall.

But Town Engineer and Public Works Director Lamar Nix had the most to say, delivering an engaging, heartfelt testimo-
nial to the crowd of 75.

“On Wednesday, Oct. 20, 1982 at the regular meeting of the Highlands Board of Commissioners and Mayor Steve Potts, it was moved by Commissioner Creswell, sec-
onded by Commissioner Crane and unan-
imously carried that Richard Betz be em-
ployed as Zoning Administrator/Building Inspector effective Jan. 1, 1983. In addition to the duties, Mr. Betz will be assigned additional duties as determined by the board.

“Ex-mayor Buck Trott also commend-
ing the years Betz has put in for the
town, and the outstanding job he’s done.

“Once, Yogi, Mac, Norman and I threat-
ed Richard with the idea that we would
join his running club. We were going to get
Speedos and cut-off T-shirts that read “I run
the road. This didn’t bother Richard. He just
grun and said, “That would be great. Y’all
NEED to run with us!"

“Working through these challenges has been tough. But Richard has the most optimistic attitude of anyone, always re-
mainin positive, helping all of us find the
solutions, helping to achieve the correct
outcome of all problems, challenges and
projects.

**American Daughter** opens Feb. 26

An American Daughter by Wendy Wasserstein opens Thursday, Feb. 26 at the Performing Arts Center.

Wasserstein became the first woman playwright to win a Pulitzer Prize and the award for best playwriting with her 1989 comedy-drama, *American Daughter*. The play was produced on Broadway in 1997 and later produced for PBS with Meryl Streep in the cast.

The five seasoned actors Sandie Trevathan, Chad Lucas, Carla Gates, Dean Zuch and Virginia Talbot round out cast of 10 in HCP’s “American Daughter” opening Thursday, Feb. 26 at the Performing Arts Center.

“American Daughter” opens Feb. 26

The five seasoned actors Sandie Trevathan, Chad Lucas, Carla Gates, Dean Zuch and Virginia Talbot round out cast of 10 in HCP’s “American Daughter” opening Thursday, Feb. 26 at the Performing Arts Center.

**On-going Events**

- **The Bascom** is offering a host of art classes for preschoolers to pre-teens from now through the school year. For more information, call (828) 526-4494, ext. 0.

Mountains in Bloom garden festival set for July 7-11

Two days of elaborate garden tours are just one part of the 2009 Mountains in Bloom garden festival, which also features a lecture series, flower show, home and garden shop, and Giverny-themed patrons party. The event will be July 7-11. Tickets are available at www.mountainsinbloom.com. Photo by Rick Demetriou

Tickets are on sale now for the Mountains in Bloom garden festival, the 11th annual nature-themed event to raise money for The Bascom visual art center. This year’s event will be July 7-11 in Highlands.

Elaborate gardens, a Giverny-themed patron party, a flower show and a home and garden shop are just a few of the spectacular treats in store for the hundreds of home and garden enthusiasts who attend Mountains in Bloom each year to raise money for the nonprofit art center.

Festival events include the following:
• Garden tours - view expansive mountain vistas with woodland trails, tour elaborate cottage gardens and access the majestic Highlands Falls waterfall.
• Lectures - hear presentations by interior designer Lady Henrietta Spencer-Churchill, landscape designer/garden restorer Chip Callaway and Highlands’ own Margie Shambaugh.
• Home and garden shop - browse and purchase the best in live plant material and unusual and distinctive items for the garden, porch, patio and home.
• Flower show - enjoy this year’s “Mountain Moments” show, including horticultural, artistic and photography divisions.
• Giverny-themed patron party - sip on cocktails and dine in tents overlooking the formal gardens at Frog Pond Farm, home of Paula and Barry Jones, owners of The Summer House.
• Photography competition and ongoing demonstrations.

“We have pulled out all the stops, and this year’s Mountains in Bloom will be the best garden festival Western North Carolina has ever experienced,” said Donna Woods, The Bascom’s events director. “Buy your tickets early so you can be sure not to miss it.”

Corporate sponsors include The Highlander and The Laurel.

For ticket information, call The Bascom at (828) 526-4949, ext. 6. Tickets can be purchased online.

... TIDBITS from page 7
Fallis Road was discussed at length. The planning board OK’d the request to subdivide the five-acre tract at its January meeting, but the Town Board has the final say concerning subdivisions.

Parnish asked to partition off a 7.5-acre tract with home from the rest, the property both of which are serviced by a septic system.

Of concern to Commissioner Amy Patterson and later agreed to by Commissioners Hank Ross, Dennis DeWolf and Larry Rogers was the amount of land available on the 7.5-acre tract to repair the septic system.

Commissioner Buzz Dotson suggested the property was grandfathered in, but others said since the property was being changed – that is subdivided – then it should be brought up to standards.

Those “standards” mean having enough property to put in a new or expanded septic field for the house if needed, since sometime in the future the tract and house separated out from the main tract could be sold outside the family.

Commissioner Patterson suggested an easement be designated “since there was obviously plenty of property surrounding the ‘new tract’ to remedy any failed septic system scenario.”

Parnish said she had no problem assigning an easement but said since such a requirement wasn’t reflected in the town zoning or subdivision ordinance she didn’t agree that she should have to comply.

“I think this has to be addressed in the code and it should be looked at in the future, but I don’t think it applies to me at this time,” she said.

Commissioner Dotson and Town Planner Joe Cooley said the septic issue was a county one. “This is something the health department will have to address eventually,” said Cooley. “They will have determined as to whether whether the subdivision has come up to new standards.” But he did say it was town policy that a property comply with current standards once it is changed.

Commissioner Patterson said since it is now a “new” lot a repair area should be designated. “We’ve had too much of one branch of government not knowing what another is doing,” she said. “There are two houses on two separate tracts and it should have two septic fields on land designated for such.”

After much discussion, Town Attorney Bill Coward said the “fix” was simple. “Just impose an easement on the adjoining property and record it with the deed. That way if it land is needed for a repair field for the new pieces it’s there.”

The board granted the subdivision plat contingent upon an easement be designated for septic repair.

Next Meeting
Next meeting the new Town Board meeting location at the Highlands Community Center in preparation for Town Hall renovations in the future.

Kim Lewicki
Anyone interested in working in New Orleans with the Highlands United Methodist Church March 27 to April 2 should call Robbie Forrester at 342-1627 for details.
The following are the Highlands Police Dept. log entries for Feb. 14-Feb 24. Only the names of persons arrested, issued a Class-3 misdemeanor, or public officials have been used.

Feb. 14
• At 3:30 p.m., officers responded to a two-vehicle accident in the parking lot of Mountain Fresh Foods. There were no injuries.
• At 4:40 p.m., officers were called to a residence on Wilson Road concerning a domestic dispute between a husband, wife and mother-in-law.

Feb. 17
• At 9:30 a.m., officers were called to RBC Centura Bank concerning the receipt of a counterfeit $20 bill.

**Hex-a-Ku©** 2009
by Pete Sarjeant and Don Cook

**OBJECT:**
A mystery word or phrase using all different letters is designated by circled squares (other short words will appear when solving, for which a list of meanings is provided). Every puzzle has a different mystery word or phrase (no spaces). Assign different letters to each square of each column and row.

**How to Solve:**
Determine the different letters among those given. Write in the mystery word using the clue and these letters. Other small words will appear in the puzzle. As in conventional crossword puzzles, a list of meanings for these Across/Down words is given and number positions shown. Doing them will speed up your solution to the puzzle. Using your powers of induction, inference and insight, place missing letters in blank squares according to the rules noted above. Focus your attention where the least number of letters are needed to complete a row or column.

Mystery Word
Briefly (6)

**Across**
1. To coil hair (4)

**Down**
2. To slice (3)
3. To attempt (3)

Solution to #BZ3F in Feb. 19 issue

Solution to Feb. 19 Hex-a-Ku
Girls' Clubhouse at the Episcopal Church, Feb. 20

McKinley Mosely and Grace Brassard kept the 2-3 year olds occupied with “ball” games.

Ivy Satterwhite and Meredith Garren read to the 5-8 year old “after-school” children.

April Moss played Candy Land with the 3-4 year olds.

Veronica Garcia and Elizabeth Houston helped 3-4 year olds make cards.

landers were out for revenge Tuesday.

The Lady Highlanders were out for revenge Tuesday.

To finance the feasibility study, the association needs $25,000 – $50,000 from the town of Franklin, $5,000 from the TDC, $5,000 from the TDA, $5,000 from the county and $5,000 from local banks.

The people behind the Living Heritage Village and Farm believe the time is right for the endeavor.

According to the NC Dept. of Travel and Tourism and the Travel Industry Association of America, special interest in travel and especially cultural tourism is on the rise; more than half the visitors to N.C. have college educations and is most interested in cultural sites; visitor spending in N.C. for 2007 was $16.5 billion; $1.3 billion in taxes were paid by visitors; $835 million in state tax revenue was realized due to visitors; and $529 million in local taxes from travel related businesses was realized.

“The establishment of the Living Heritage Village and Farm can be a major component in the economy future of Macon County and the entire region,” reads the report. “Our location makes us uniquely situated to serve as a central hub from which visitors can be directed all over the region.”

... FINALE continued from page 13

A slow start quickly derailed those hopes however, as the Highlanders trailed 11-2 early and never recovered, falling 78 to 48. The Highlanders finished the season with a 10-18 record. While winning 10 games at a school the size of Highlands is always an accomplishment, there was certainly some disappointment with the final results of a season that began with high expectations.

On Tuesday, the Lady Highlanders hosted a first-round playoff game against the Hendersonville Lady Bearcats. Hendersonville defeated the Lady Highlanders in a close game earlier in the season, and the Lady Highlanders were out for revenge Tuesday.

Highlands followed by 3 early before taking a 4-point halftime lead. In the second half, the Lady Highlanders stepped up their defensive pressure, and youth was served thanks to the efforts of freshmen Emily Mugger and Julianne Buras as well as sophomores Marlee McCall.

All three underclassmen combined for 46 of the Lady Highlanders 65 points in a 65 to 55 victory.

The Lady Highlanders will play today, Thursday, Feb. 26, in a second-round matchup with top-10 Robbinsville. The game has a 7 o'clock start, and will be in Robbinsville — so please come out and support your Lady Highlanders as they play for a birth in the Sectional Finals.
